Datasheet

Acapatamab Biosimilar - Anti-FOLH1;CD3E mAb - Research Grade

PX-TA1639

Overview

Antibody name: Acapatamab Biosimilar - Anti-FOLH1;CD3E mAb - Research Grade

Isotype: Bispecific scFv;Kappa;Lambda

Host species: Humanized

Production Host: XtenCHO

Source: CAS 2314491-93-3

Aliases/Synonyms: ACAPATAMAB,IMMUNOGLOBULIN SCFV-SCFV-SCFC, ANTI-(HOMO SAPIENS FOLH1 (FOLATE HYDROLASE, PROSTATE SPECIFIC MEMBRANE ANTIGEN, PSMA)) AND ANTI-(HOMO SAPIENS CD3E (CD3 EPSILON, LEU-4)), MONOCLONAL ANTIBODY SINGLE CHAIN (SCFV)2-SCFC, BISPECIFIC

Properties

Clonality: Monoclonal Antibody

Final buffer: PBS buffer PH7.5

Purity: >95%

Storage advice:

ProteoGenix did not perform stability or storage tests for your specific end products.
Here are some **standard storage advice**:
- Store at 4°C for short term; Freeze and store at -20°C or -80°C for long term
- Freezing should be first tested on small aliquot(s); Glycerol up to 50% may be added for cryoprotection. Purified protein/antibodies sometimes require additives for optimal freezing and storage, and/or a specific freezing process (e.g., -20°C, -80°C, or flash freezing in liquid nitrogen).
- Purified proteins/antibodies should ideally be stored as 0.5 to 2mg/ml stock solutions.
- Avoid freeze/thaw cycles: aliquot the products according to your needs.

Note:

For research use only. Not suitable for clinical or therapeutic use.
